10-POINT PLAN FOR BUILDING A SAFER LENNAR CONSTRUCTION SITE

1. Hand hygiene

Wash with soap and water and sanitize when you can, especially after using common restrooms and when either entering or leaving a home site. Use the hand sanitizer provided in portable restrooms.

2. Let it go

We are all friends and family – but until the Coronavirus is behind us, stay away from shaking hands, or doing fist & elbow bumps.

3. Stay off your face

The easiest way to catch germs is by touching your face, so train yourself not to.

4. Be considerate

Help prevent the spread of germs: stay home if you are sick. If one of your associates appears to be sick, please do not be offended if he or she is asked to leave by the Lennar Construction Manager to protect others.

5. Communicate

If you have any questions or concerns, please call your Lennar Director of Construction or your Area Manger in the field.

6. The CDC and your family physicians are the experts

There's so much information out there - so be informed by visiting the **CDC website** for the very latest. If you believe that you may be symptomatic, please consult your primary care provider.

7. Sanitize as you go

If available, use sanitizers or other cleaning materials to keep your tools and your work product (countertops, sinks, faucets, wall and floor tiles) clean at least once per day. Do not leave the home until cleaning up after your work.

8. If it isn't business critical, use technology

Err on the side of caution. Communicate as much as you can by phone or e-mail, as opposed to face to face meetings in groups.

9. Keep your smartphone smart

You'd be surprised how many germs your phone accumulates; get in the practice of sanitizing it daily.

10. Prevent the panic

Rely on the above 9 steps, be informed, and remember Lennar Cares about you. We will do our part… so please do yours.

LENNAR®

Contact your Lennar Director of Construction if you have any questions or concerns. If we don't have the answers, we will get them. We will get through this together.
